This presentation focuses on the importance of understanding the true history of our nation and the pervasive biases and stereotypes rooted in skin color, particularly against those with darker skin. To foster progress, we must actively combat anti-Blackness by embracing anti-racist principles and recognizing the harm caused by microaggressions.

These subtle but impactful actions affect individuals regardless of their race, ethnicity, culture, skin color, or sexual orientation, making it crucial to address them in the pursuit of equity and justice.

Snacks will be provided.
