

BAS in Advanced Paramedic Practice

Program Outcomes

- Complete an advanced medical assessment to establish a patient care plan incorporating findings from a physical exam, history (PMX and HPI) and lab values.
- Assist patients with emotional and psychological conditions or crisis.
- Assist patients with acute and chronic medical and traumatic conditions.
- Work collaboratively with healthcare agencies and services to establish an integrated healthcare network to better serve communities.
- Evaluate current research and perform new research to assess current best medical practice and community needs.
- Work collaboratively with healthcare agencies and services to establish preventive strategies to foster healthier communities.
