

Building Skills for the Future

PCC's workforce training program will have in-class and experiential learning, during which students will complete remodels and new construction of blighted properties.

Through a partnership with the Colorado attorney general, this 16-week program allows students to spend time in class and labs. Students will receive a \$15 an hour stipend for their afternoon work on the job site.

Students will receive basic hand tools and a tool belt. Class textbooks are also provided at no cost. Students will have access to equipment normally found on a job site, including power tools, ladders, and safety equipment.

Introduction to Craft Skills includes:

- Construction site safety orientation
- Intro to construction math
- Intro to hand tools
- Intro to power tools
- Intro to construction drawings
- Intro to basic rigging
- Basic communication skills
- Basic employment skills
- Intro to material handling

Carpentry Level 1 includes:

- Orientation to the trade
- Building materials, fasteners and adhesives
- Hand and power tools
- Intro to construction drawing, specifications & layouts
- Floor systems
- Wall systems
- Ceiling joist and roofing framing
- Intro to building envelope systems
- Basic stair layouts

Class schedule:

- **Classroom and lab sessions**
Wednesday, Thursday and Friday 8 am-1 pm,
Room 234B, Gorsich Advanced Technology Center,
- **Job site**
Saturday 8 am-2 pm, locations TBA

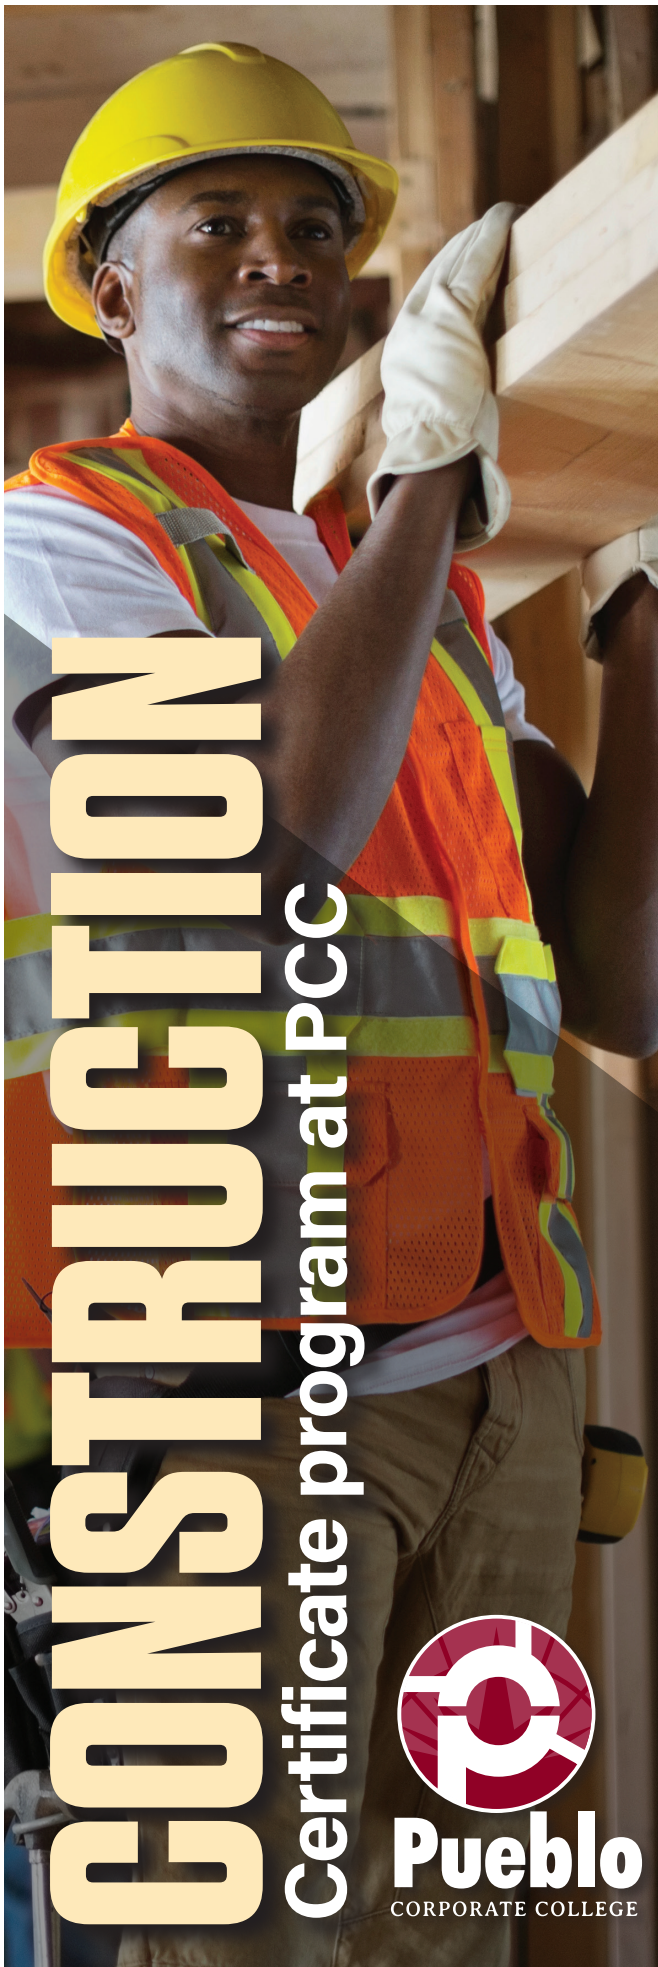

Classes begin May 1

PCC Pueblo Campus | 900 W. Orman Ave.
